

TRACKR

Project Summary

Trackr is a minimalist personal habit tracking Progressive Web App (PWA).

The application is designed primarily for a single user but should be architected so future multi-user expansion is possible.

The product focuses on:

- Daily habit tracking
- Weekly habit tracking
- Streak calculations
- Calendar visualization
- Mobile usability
- Free-tier hosting and infrastructure

Target User

One personal user.

Core Goal

Open app daily.

Check off habits.

View progress.

Maintain streaks.

Tech Stack

Frontend:

- React
- TypeScript
- TailwindCSS
- Vite

Backend:

- Firebase Authentication
- Firestore

Hosting:

- Vercel

Non Goals

Do NOT build:

- Notes
- Categories
- Notifications
- Analytics dashboard
- Social features
- Teams
- AI features
- Native mobile app

Keep MVP simple.
